Subject: SVHC candidate list

30.01.2019

Dear customer,

the SVHC candidate list (candidate list of substances of very high concern for authorization) is a list of chemical substances, which have been identified under the REACH regulation with dangerous properties.

The list is part of the REACH regulation under annex XIV.

Actual status of this list: January, 2019 with 197 substances.

Our products do not include any substances listed in this document above the tolerable limits with the following exceptions

- 1) Panasonic prepreg R-1650M and R-1650V. This prepreg contains the substance Bisphenol-A (CAS No. 80-05-7) > 0.1 %. After pressing the prepreg is polymerized (cured). In the cured product (R-1755M, R-1755V) Bisphenol-A is not present anymore. There is now a new and nonvolatile substance.***
- 2) Panasonic Megtron 4 and Megtron 4S contain Bisphenol-A > 0.1 %***

Sincerely,

(ppa. Walther Bach, Product Management and Quality MSC Polymer AG)
